

It's proven that Turkish artists are spreading across the globe very successfully. Our goal as Istanbul International Opera Audition is that we would like to open the doors European and World opera stages to Turkish opera artists that possess a very high quality in terms of voice quality, technical standard, and musically.

The visa requirements for going to European countries have been a big trouble for touring artists and also traveling costs are becoming very high in the recent years.

We would like to lower the cost of travelling; we are inviting important opera directors from Europe for our artists to perform in their home country, Turkey.

Your attendance to this event will honor us and also give a joyful experience for our artists to perform in front of this very important jury.
